2024 May – present Freelance	Senior Frontend Engineer blackEonfinite Worked with a four member team in building the initial versions of Eonfinite's low code flagship platform. Making use of past experience building low code platform in helping the team identify risks and mistakes early, and guiding in building the frontend. KonvaJs	black blackRemote
2024 Feb – 2024 May full time	Senior Frontend Engineer blackGradRight Worked as a Senior Engineer on SelectRight™ & FundRight™, using Vue.Js on frontend and Node.Js with MongoDB on the backend.  SelectRight - darkgrayThe hassle-free platform to find the 'right program' for your Master's abroad. SelectRight™ is a platform where Students searching for universities to do masters can get unbiased and personalized recommendations from 10k plus programs, see chance scores, attend webinars, get invited and also chat with universities.  Collaborating with the product design team for the redesign of the app experience Preparing the Storybook, building components & userflows. Integrating the components from Storybook with apis. Fixing production bugs,adding performance improvements,participating in code reviews. Storybook / Figma / Vuex / Vue.Js / Quasar  FundRight - darkgrayThe hassle-free platform to find the 'best loan' for your Master's abroad. fundRight™ is a loan bidding platform, where students looking for study abroad loans can get bids from more than 15 lenders.  Implemented an improved partner university feature, where students in GradRight's partner universities, can have a faster, superior onboarding experience. Understanding the product requirements, communicating with the product manager on required changes, preparing userflow diagrams.. Fixing production bugs and refactoring existing code. Participating in agile ceremonies. Vuex / Vue.Js / MongoDB / Node.Js	black blackHyderabad

2021 Apr –  
2023 Sep  
full time

Software Engineer blackNeoITO.

black blackTrivandrum

Worked as a core team member for the Appblocks project, playing a crucial role in taking the idea to an MVP.

AppBlocks™ - darkgray Low-code dev platform and marketplace.

Appblocks is an opensource low-code development platform and a marketplace for composable code blocks, it powers applications like Happilee™ & Aasani™

Designed & Lead the development of the CLI for Appblocks, the BB-CLI, used to create, stitch and publish blocks to marketplace

Implemented plugin architecture using webpack's tapable library in CLI, to enable developers to load external plugins to extend CLI's capabilities

Created a version control layer over git in CLI to easily manage git operations on blocks

Developed custom inquirerJs & webpack plugins to meet application workflow needs

Created block templates to make the development process easier for users

Developed a CI/CD workflow for applications built in blocks architecture

Participated in technical discussions, and contributed to design & architecture decisions.

Mentoring Junior Engineers & participating in agile ceremonies.

Node.Js / tapable.Js / Webpack / Inquirer.Js / Commander.Js / GithubActions  
/ React.Js / Typescript / Rust / HTML / CSS / micro-frontends / low-code  
platforms / composable enterprises

2019 Nov –  
2021 Mar  
full time

Software Engineer blackSinergia Media Labs.

black blackKochi

Worked mostly on two projects at SIME Labs, one was maintaining SYF (Share Your Fortune) and the second one was with MyGate for a contract period.

Share Your Fortune - darkgraycrowdfunding website for social causes.

Migrated the application to a new React version

Fixed Firebase api end points, integrated Stripe payment gateways & SendGrid apis and fixed UI bugs

Developed a new admin dashboard

Built real-time graphs and tables to monitor user contributions and visualize various other analytics, using d3js and Firebase

HTML / CSS / React.Js / Firebase / D3.Js

Mygate - darkgraySecurity and community management solutions for gated communities.

Implemented the frontend for Election Poll and Survey features for mygate application, where the society admin can create elections and surveys from web or mobile and the residents can vote or participate in surveys from mobile application

Collaborated with MyGate team to improve the UI/UX of their mobile and web apps

HTML / CSS / JQuery

blackwhiteEDUCATION

2013 – 2017

BTech blackCochin University of Science & Technology

black blackIndia

Bachelor's degree in Computer Science & Engineering. Academic projects include online judge for evaluating Computer programs and Computer Aided Process Planning research.
